

Our editorial staff is preparing the following key topics:

Fachpack 2018 – The real trade fair event in the packaging industry

The Fachpack in Nuremberg (September 25-27) has long since developed into one of the leading European trade fairs for packaging. In the September issue of Flexo+Tief-Druck, on our portal, in our social media channels as well as in four special newsletters, we will report in detail about this trade fair event.

Round printing formes for flexo printing

The round flexo printing forme is far too expensive, the quality is not sufficient and the availability is poor. But is this judgment justified? Compared to the flexo printing plate, the round printing forme offers many advantages. In addition, delivery times, quality and the price-performance ratio have improved noticeably.

Investment in the production of embossing and gravure printing formes

The Austrian package printer A&R Carton Graz belongs to the leading producers of Tobacco Packaging in Europe. Constantly increasing product requirements induced A&R to invest in the production of gravure cylinders and embossing rollers.

Compact sized lamination machines

For manufacturers of flexible packaging lamination is an indispensable part of the value chain. Numerous machine manufacturers have launched new, compact sized lamination machines, which mainly cover the segment of narrow and medium web widths. The editors of Flexo+Tief-Druck present an overview of the latest compact sized lamination machines and their performance.

The last step – the reel confectioning

In the value chain of flexible packaging production, reel confectioning on a slitter and the subsequent packaging represent the last step. Small lot sizes, difficult materials and high deadline pressure require a high degree of automation to effectively and error-free cut the reels and finally enable the finished reels to be shipped to the customer.

Digital printing is redirecting the European preprint market

Over the past two years, European producers of corrugated packaging have increased their preprint capacity by investing in digital printing. However, the capacities of analogue printing and finishing remained almost untouched. Which changes in the area of preprint will digital printing entail? The editors of Flexo+Tief-Druck interviewed the experts from HP and Conprinta as well as the Thimm Group.

Publication date
10 September 2018

Editorial deadline
13 August 2018

Advertising closing
20 August 2018

Flexo+Tief-Druck 5-2018 (September) will appear in the run-up to these important industry events:

DFTA-Herbstfachtagung
Fulda/Germany
13 September 2018

FachPack
Nuremberg/Germany
25–27 September 2018

ERA Packaging & Decorative Conference
Turin/Italy
7–8 November 2018

Flexo+Tief-Druck The special section

Digital Printing today focuses on digital printing package printing

Flexo+Tief-Druck Leading German-language technical magazine for package printing and converting industries

Flexo+Tief-Druck Current product and industry news

Flexo+Tief-Druck Reports on markets, fairs and events

Flexo+Tief-Druck 6x per year as a print edition, always up to date on flexotiefdruck.de

The flexible option in packaging printing

The use of a hybrid machine can result in a multitude of new application possibilities for the package printer. An interesting configuration is e.g. the combination of an inkjet unit with flexo technology.
